

DMN

BPMN

CMMN

Many business processes consist of **rule driven decisions**, **structured workflows** and **unstructured case handling**. Camunda BPM integrates the OMG standards **DMN**, **BPMN** and **CMMN**, allowing you to model and automate such business processes in an end-to-end fashion.

Decision Model and Notation

For decision automation based on business rules

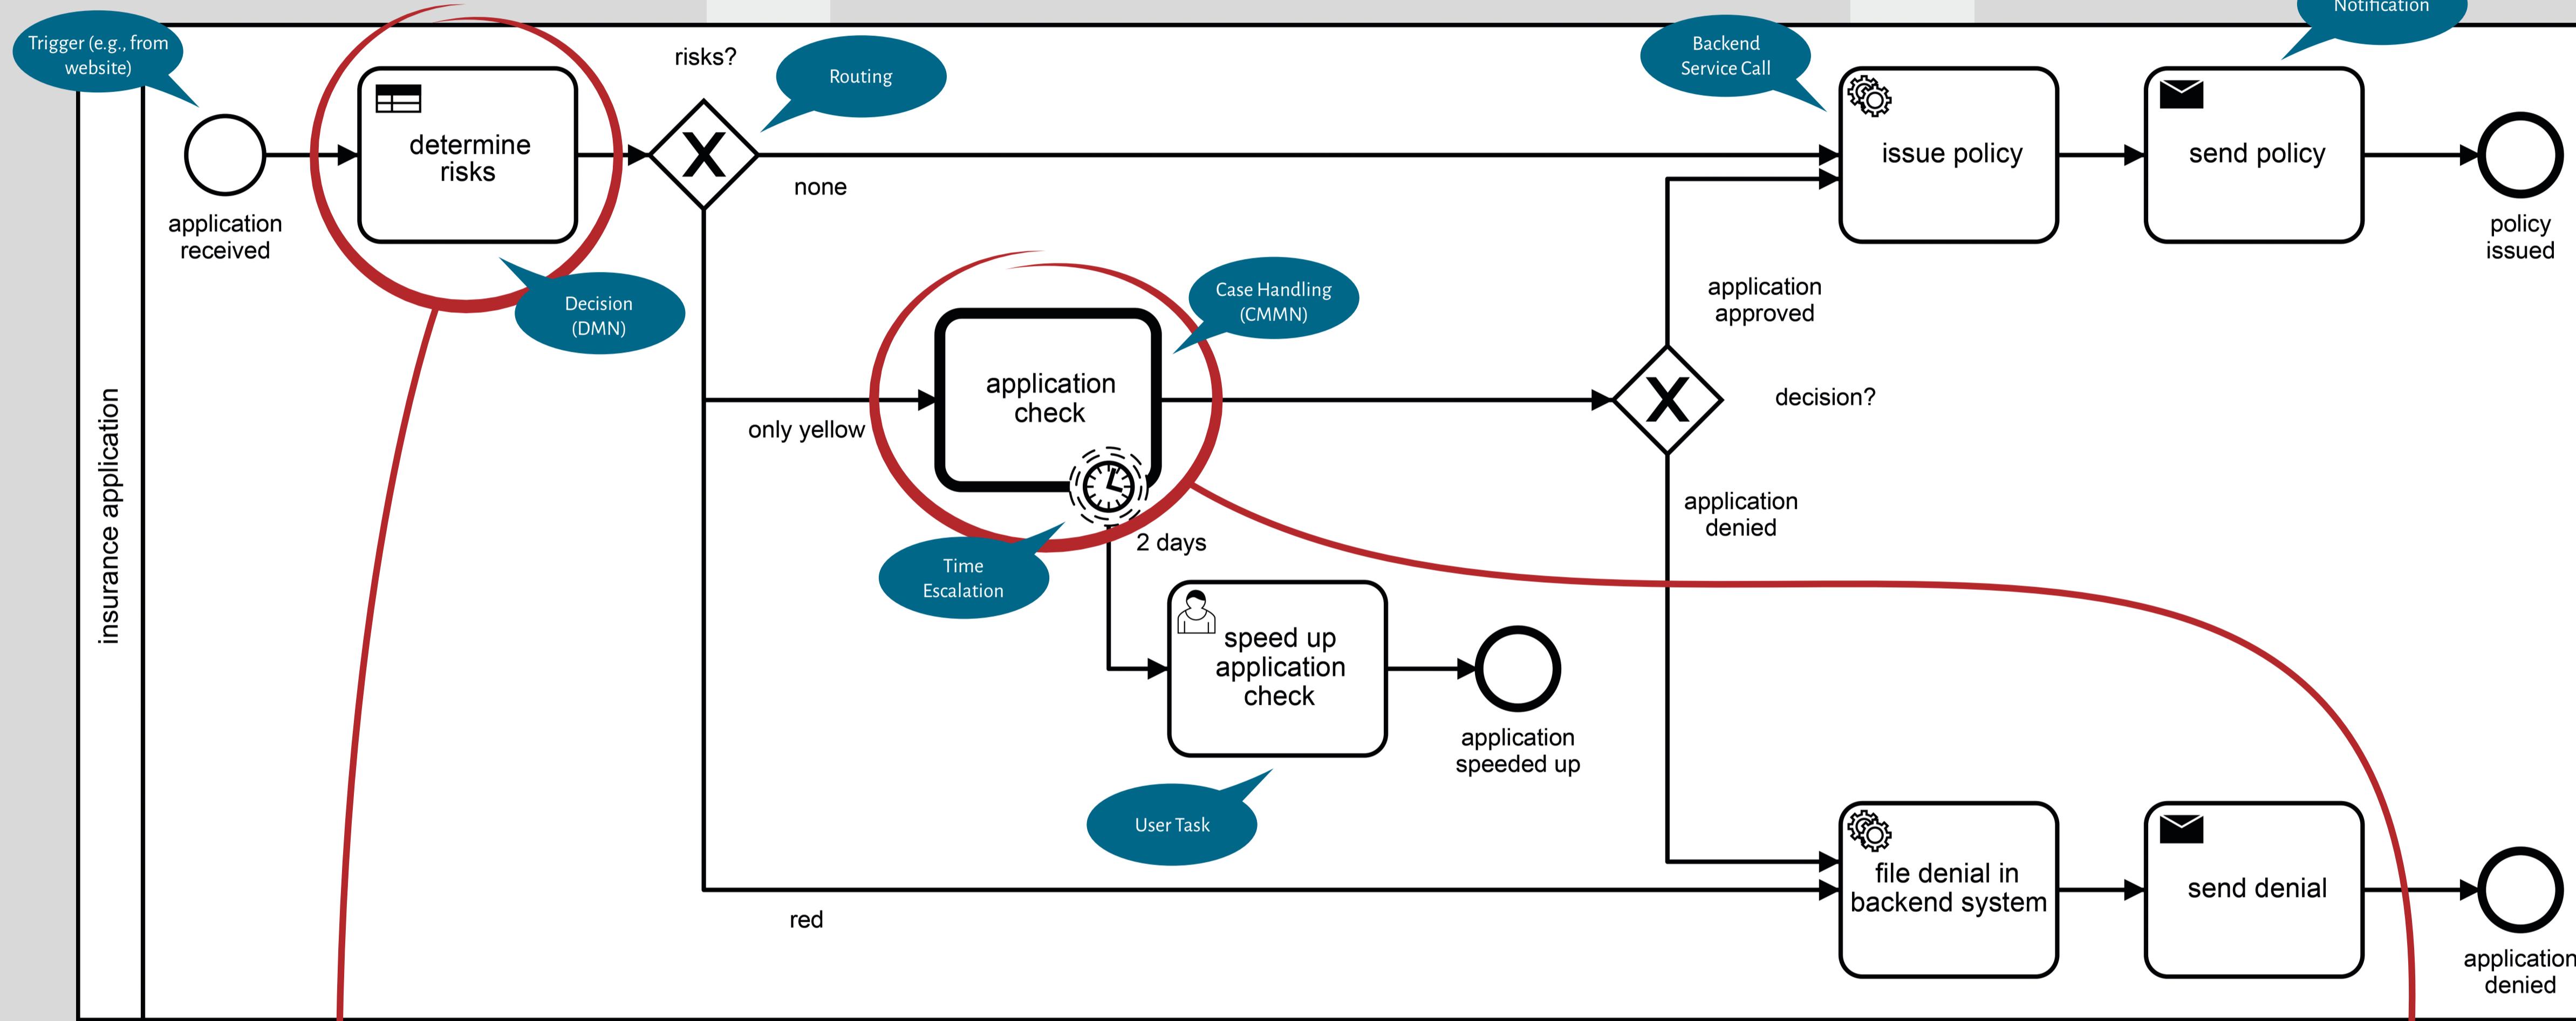

Business Process Model and Notation

For structured (sub-)processes with a potentially high level of automation

Case Management Model and Notation

For less structured activities with a lower level of automation

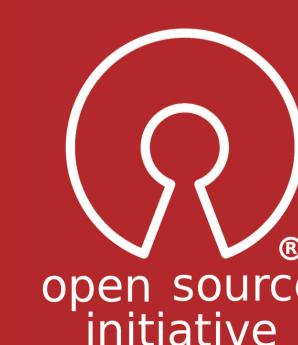

BPMN example: car insurance application

DMN example: determine risks

C	Input			Output	
	Age	Car Manufacturer	Type of Car	Risk	Risk Evaluation
1	<= 21	–	–	“beginner”	“yellow”
2	<= 30	“BMW”	–	“young and fast”	“yellow”
3	–	“Porsche”	“911”	“careless speeding”	“yellow”
4	–	“BMW”	“X3”	“premium car”	“yellow”
5	<= 25	“Porsche”	“911”	“young and too fast”	“red”
